

Digi Teachers Working Online Toolkit

Campus Esment

WHY: It is a shared knowledge platform, in which the professionals (who have the specific knowledge) create the content and share it with other professionals. The pedagogical objective is to provide professionals with an accessible environment where they can find all the information/training that will help them in their daily work and allow them to promote internally.

WHO: It is for all the people hired in the entity, both for technicians and for people with support needs. We currently have more than 120 contents uploaded to the platform.

WHAT: We have adapted training that allows them to access the knowledge they need to develop in their job.

WHICH: It is responsive; it can be accessed through Smartphone, tablet and PC.

HOW: Each person is enrolled in the training courses that they are obliged to attend. When they enroll, they receive an email with the course link. Access is through the user (email) and the same Windows password. The tool sends notifications if the person does not complete the mandatory training. On the other hand, each person can choose, from the other training courses, other content that may be of interest to them.
