

# Digi Teachers Working Online Toolkit

## Robot Nao

### WHY:

These objectives aim to enhance the learning experience, foster personal development, and promote social integration among these special needs children. The following are the key educational goals:

- Engagement and Motivation
- Communication Skills
- Social Interaction

**WHO:** The service of Esment Infancy for children with ASD and other support needs and the professionals (therapists).

**WHAT:** The benefits of the Robot Nao are:

Enhanced Engagement: The robot effectively captivates and sustains the attention of children, fostering increased engagement in learning and communicative activities and stimulation.

Facilitated Communication: It aids in the development of communication skills by providing a supportive and interactive platform for children, promoting both verbal and non-verbal communication.

**WHICH:** Robot Nao

**HOW:** Robot Nao is an autonomous robot that can be programmed to do what the professionals needs to work with the children. It can also be use in remote. In this case the IT specialist can control the information that the Robot says and can manipulate the questions and answers of the robot.
